

Technical Bulletin

July 12, 1966

TO ALL MAINTENANCE ENGINEERS - CHANGES

NO. MODELS

SUBJECT: SERVICE MANUAL H-100 INSTRUMENTS

39 H-100 series

Enclosed is a copy of the Service Manual for the recently introduced "H" series of instruments. We suggest you review this book thoroughly, in order to acquaint yourself with the circuitry associated with the new features incorporated in these instruments.

Usually in early September your local school system is alerting, by route of newspapers, persons interested in reviewing or updating their electronic knowledge. Sophisticated circuitry, is, and will appear more often in all electronic products, making the updating of your knowledge a must. We strongly urge you to consider such classes as will assist you in your day-to-day work.

NOTE: This bulletin is a confidential letter to the Hammond dealer organization and is not for general distribution.
