

RODGERS SW 7.5a SUBWOOFER Product Features

The SW 7.5a is the new version of the original Rodgers SW 7.5, and features refined cabinet aesthetics and tuning, as well as the addition of a professional recessed 5-way binding post input terminal assembly. Because of the furniture-like appearance and the floor-loading design, it can be positioned almost anywhere in a room. When used in the floor-loaded configuration, there are no exposed speakers; grilles are not required.

- Sensitivity : 90dB SPL @ 1 watt/1 meter.
- Power handling : 100 watts RMS.
- Nominal impedance : 8 ohms.
- Designed to reproduce extremely low frequencies; from 16hz through 100hz.
